Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest individually or in combination the following:

the storage control apparatus classifies the plurality of channel ports of the storage control apparatus to which the channel path is connected into priority channel ports and non-priority channel ports, so that channel ports defined as priority channel ports carry out I/O processing without suppressing the processing of I/O from the computers; and channel ports defined as non-priority channel ports are given a target value in I/O process units and carry out processing while performing feedback control so that I/O processing from the computers approaches the I/O process units; and wherein the storage control apparatus controls the level of the influence of non-priority channel port I/O processing on priority channel port I/O processing.

For these reasons claims *1 and 8-10* are deemed to be allowable over the prior art of record, and claims *2-7* are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
